SILVER QUEST RESOURCES LTD.
Notes to the Consolidated Financial Statements
for the three months ended May 31

1. BASIS OF PRESENTATION

The interim period consolidated financial statements have been prepared by the Company in accordance with Canadian generally accepted accounting principles. All financial summaries included are presented on a comparative and consistent basis showing the figures for the corresponding period in the preceding year. The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of annual financial statements. Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles has been condensed or omitted. These interim period consolidated statements should be read together with the audited consolidated financial statements and the accompanying notes included in the Company's latest annual report. In the opinion of the Company, its unaudited interim consolidated financial statements contain all adjustments necessary in order to present a fair statement of the results of the interim periods presented.

Certain reclassifications have been made to the prior period financial statements to conform to the current period presentation.

Changes in accounting policies

Effective March 1, 2008, the Company adopted new accounting policies of the Canadian Institute of Chartered Accountants Handbook:

Assessing Going Concern

Section 1400 requires management to assess and disclose an entity's ability to continue as a going concern.

Financial Instruments - Disclosures

Section 3862, Disclosure is required to enable users to evaluate (a) the significance of financial instruments for the entity's financial position and performance; and (b) the nature and extent of risks arising from financial instruments to which the entity is exposed during the period and at the balance sheet date, and how the entity manages those risks. The principles in this section complement the principles for recognizing, measuring and presenting financial assets and financial liabilities in Section 3855, Financial Instruments – Recognition and Measurement, Section 3863, Financial Instruments – Presentation, and Section 3865, Hedges.

Financial Instruments - Presentation

Section 3863, Presentation is required to enhance financial statement users' understanding of the significance of financial instruments to an entity's financial position, performance and cash flows. This section establishes standards for presentation of financial instruments and non-financial derivatives. It deals with the classification of financial instruments, from the perspective of the issuer, between liabilities and equity, the classification of related interest, dividends, losses and gains, and the circumstances in which financial assets and financial liabilities are offset.

Capital Management

Section 1535, Disclosure is required to provide information about an entity's capital and how it is managed.

2. NATURE AND CONTINUANCE OF OPERATIONS

The Company is incorporated under the Business Corporations Act, British Columbia and is considered to be in the exploration stage with respect to its mineral properties. Based on the information available to date, the Company has not yet determined whether its mineral properties contain ore reserves.

The recovery of the amounts comprising mineral properties and deferred exploration costs is dependent upon the confirmation of economically recoverable reserves, the ability of the Company to obtain necessary financing to successfully complete their exploration and development, and upon future profitable production.

These financial statements have been prepared by management on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future.

12. FINANCIAL INSTRUMENTS

The Company's financial instruments consist of cash, receivables, marketable securities, and accounts payable and accrued liabilities. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial instruments. The fair value of these financial instruments approximates their carrying values, unless otherwise noted.

Currency risk

The Company is exposed to financial risk arising from fluctuations in foreign exchange rates and the degree of volatility of these rates. The Company does not use derivative instruments to reduce its exposure to foreign currency risks.

13. SEGMENTED INFORMATION

The Company primarily operates in one reportable segment, being the acquisition and exploration of mineral property interests in Canada, the United States and Mexico.
