Supplemental disclosure with respect to cash flows (Note 11)

1. BASIS OF PRESENTATION

The interim period consolidated financial statements have been prepared by the Company in accordance with Canadian generally accepted accounting principles. All financial summaries included are presented on a comparative and consistent basis showing the figures for the corresponding period in the preceding year. The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of annual financial statements. Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles has been condensed or omitted. These interim period consolidated statements should be read together with the audited consolidated financial statements and the accompanying notes included in the Company's latest annual report. In the opinion of the Company, its unaudited interim consolidated financial statements contain all adjustments necessary in order to present a fair statement of the results of the interim periods presented.

Certain reclassifications have been made to the prior period financial statements to conform to the current period presentation.

Changes in accounting policies

Effective March 1, 2008, the Company adopted new accounting policies of the Canadian Institute of Chartered Accountants Handbook:

Assessing Going Concern

Section 1400 requires management to assess and disclose an entity's ability to continue as a going concern.

Financial Instruments - Disclosures

Section 3862, Disclosure is required to enable users to evaluate (a) the significance of financial instruments for the entity's financial position and performance; and (b) the nature and extent of risks arising from financial instruments to which the entity is exposed during the period and at the balance sheet date, and how the entity manages those risks. The principles in this section complement the principles for recognizing, measuring and presenting financial assets and financial liabilities in Section 3855, Financial Instruments – Recognition and Measurement, Section 3863, Financial Instruments – Presentation, and Section 3865, Hedges. (Note 12)

Financial Instruments - Presentation

Section 3863, Presentation is required to enhance financial statement users' understanding of the significance of financial instruments to an entity's financial position, performance and cash flows. This section establishes standards for presentation of financial instruments and non-financial derivatives. It deals with the classification of financial instruments, from the perspective of the issuer, between liabilities and equity, the classification of related interest, dividends, losses and gains, and the circumstances in which financial assets and financial liabilities are offset. (Note 12)

Capital Management

Section 1535, Disclosure is required to provide information about an entity's capital and how it is managed. (Note 13)

Recent Accounting Pronouncements

International Financial Reporting Standards ("IFRS")

In 2006, the Canadian Accounting Standards Board ("AcSB") published a new strategic plan that will significantly affect financial reporting requirements for Canadian companies. The AcSB strategic plan outlines the convergence of Canadian GAAP with IFRS over an expected five year transitional period. In February 2008 the AcSB announced that 2011 is the changeover date for publicly-listed companies to use IFRS, replacing Canada's own GAAP. The date is for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of January 1, 2011 will require the restatement for comparative purposes of amounts reported by the Company for the year ended December 31, 2010. While the Company has begun assessing the adoption of IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

1. BASIS OF PRESENTATION (continued)

Business Combinations, Consolidated Financial Statements and Non-controlling Interest

In January 2009, the CICA issued Handbook Sections 1582 "Business Combinations", 1601 "Consolidated Financial Statements" and 1602 "Non-controlling Interests" which replace CICA Handbook Sections 1581 "Business Combinations" and 1600 "Consolidated Financial Statements". Section 1582 establishes standards for the accounting for business combinations that is equivalent to the business combination accounting standard under IFRS. Section 1601 together with Section 1602 establishes standards for the preparation of consolidated financial statements. These Sections are applicable for interim and annual consolidated financial statements for fiscal years beginning January 1, 2011. Early adoption of these Sections is permitted and all these Sections must be adopted concurrently.

2. NATURE AND CONTINUANCE OF OPERATIONS

The Company is incorporated under the Business Corporations Act, British Columbia and is considered to be in the exploration stage with respect to its mineral properties. Based on the information available to date, the Company has not yet determined whether its mineral properties contain ore reserves.

The recovery of the amounts comprising mineral properties and deferred exploration costs is dependent upon the confirmation of economically recoverable reserves, the ability of the Company to obtain necessary financing to successfully complete their exploration and development, and upon future profitable production.

These financial statements have been prepared by management on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future and repay its liabilities arising from normal business operations as they become due.

The Company has incurred ongoing losses and there is substantial doubt about the Company's ability to continue as a going concern. The Company has reduced expenditures to conserve cash, including curtailing most exploration activities. A number of alternatives including, but not limited to selling an interest in one or more of its properties or completing a financing, are being evaluated with the objective of funding ongoing activities and obtaining additional working capital.

The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

11. SUPPLEMENTAL DISCLOSURE WITH RESPECT TO CASH FLOWS

There were no significant non-cash transactions for the period ended May 31, 2009.

Significant non-cash transactions for the period ended May 31, 2008 included the accrual in accounts payable and accrued liabilities of \$6,110 of deferred exploration costs.

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Company's financial instruments consist of cash, receivables, exploration deposits and accounts payable and accrued liabilities. The fair value of these financial instruments approximate their carrying values, unless otherwise noted.

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

The Company is exposed to a variety of financial risks by virtue of its activities, including credit risk, interest rate risk and liquidity risk. The overall risk management program focusses on the unpredictability of financial markets and seeks to minimize potential adverse effects on financial performance. Risk management is carried out by management under the direction and guidance of the Board of Directors. Management is responsible for establishing controls and procedures to ensure that financial risks are mitigated to acceptable levels.

Credit risk

Credit risk is the risk of a financial loss to the company if a counter-party to a financial instrument fails to meet its contractual obligation.

The Company manages credit risk by carrying short-term investments with investment grade ratings. The Company's receivables consist primarily of sales tax receivables due from federal and provincial government agencies and receivables from vendors with whom the Company has established credit policies. The Company does not have a significant concentration of credit risk with any single counter-party. The maximum exposure to credit risk at the reporting date is the carrying value of the Company's receivables and cash.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Financial assets and liabilities with variable interest rates expose the Company to cash flow interest rate risk. The risk that the Company will realize a loss as a result of the decline in the fair value of any short-term investments included in cash is limited because these investments, although available for sales, are generally held to maturity.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances, asset sales or a combination thereof. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

The Company is exposed to financial risk arising from fluctuations in foreign exchange rates and the degree of volatility of these rates. The Company does not use derivative instruments to reduce its exposure to foreign currency risks.

13. CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The properties in which the Company currently has an interest are in the exploration stage; as such the Company has historically relied on the equity markets to fund its activities. In addition, the Company is dependent upon external financings to fund activities. In order to carry out planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional funds as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

13. CAPITAL MANAGEMENT (continued)

The Company's financial instruments consist of cash, receivables, marketable securities, and accounts payable and accrued liabilities. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial instruments. The fair value of these financial instruments approximates their carrying values, unless otherwise noted.

14. SEGMENTED INFORMATION

The Company primarily operates in one reportable segment, being the acquisition and exploration of mineral property interests in Canada.
